

The tank has a possibility of using a 12kw Three Phase heating element which we would like to use with the excess/export electricity when available. Trouble, I cannot find a 3 Phase Diverter to send the 3 phase electricity to the 3 phase 12kw element. All that is available are mono phase diverters Would anyone be able to help ? Thanks

A 3-phase UPS is used to protect larger loads, typically 10 kW to several MW, which use 3-phase power distribution. A single-phase UPS is used to protect smaller loads, typically less than 10 kW. 3-phase UPSs are used for a wide range of applications: Data centers, colocation facilities, and computer rooms; Light industry and commercial buildings
