Quick note: How much power does a 5.5 kW solar system produce? It just produces 10% more kWh than a 5 kW system. You can use the chart above, add 10% to these kWh outputs, and get the correct results. Example: At 5 peak sun hours, a 5.5 kW solar system produces 20.63 kWh/day, 618.75 kWh/month, and 7,425 kWh/year.

The price of installing solar has decreased dramatically over the last 10 years. What was once prohibitively expensive is now something most of us can easily afford - especially with all the different financing options out there!. Installing solar now costs about \$3 per watt, 60% less than just 8 years ago in 2009! At this rate, your 5kW installation costs about \$15,000.
