Will Antigua & Barbuda achieve a net-zero carbon economy by 2030?

With the Caribbean -island state of Antigua and Barbuda having committed to achieving an entirely renewable energy system by 2030, as part of a path to a net-zero carbon economy by mid century, a study prepared by the International Renewable Energy Agency (IRENA) has placed solar front and center of the energy transition needed.

What is Antigua & Barbuda's energy policy?

Antigua and Barbuda published a draft of its National Energy Policy in December 2010, with the dual goals of reducing energy costs by diversifying away from fossil fuels and driving development of new technologies and sectors.

Who owns the power in Antigua & Barbuda?

Under the terms of the deal, the Antiguan government will retain a 51% share in WIOC.<sup>10</sup> Antigua and Barbuda's generation resources are owned primarily by APUA, with the remainder owned by the sole independent power producer (IPP) currently in operation-- Antigua Power Company Limited (APC); other IPPs are allowed but none exist to date.

How much does electricity cost in Antigua and Barbuda?

Crucially, the current electricity cost of \$0.15/kWh in Antigua and Barbuda could be reduced to \$0.105/kWh under such a generation mix, with a low of \$0.09/kWh possible under the most capital intensive, all-clean-energy-plus-hydrogen-and-EVs approach.

Can a wind power plant be used in Barbuda?

Another case is the large wind energy potential on Barbuda, which could easily satisfy the local energy needs--the island is currently served by a 7.2-MW diesel power plant.<sup>21</sup> Inter-connections to nearby islands could increase the potential benefits from this wind resource and spread them to other parts of the country as well.

Could Irena power Barbuda?

IRENA has instead proposed 2.07 MW of solar and 4.6 MWh of storage to attain almost 95% clean power for the island, and suggested biodiesel could offer a route to 100% renewables. IRENA said its system would see the \$0.48/kWh electricity price on Barbuda fall to \$0.16.

Masdar is implementing a hurricane-resistant clean energy plant in Antigua and Barbuda contributes to Antigua and Barbuda's goal of producing 15 percent of its electricity needs from renewable sources by 2030. Listen text or icon. Go Low Carbon. en. ...
