Cuba's 2014 commitment to generate 24% of the country's electricity from renewable sources by 2030 presents a unique opportunity to explore how an island nation can decarbonize its power system. To successfully increase renewable energy production of electricity from approximately 4% of Cuba's supply mix to 24%, the government plans to install 2,144 MW of new renewable ...

Among the international-level recommendations, the report suggests the benefits of dialogue between the United States and Cuba in promoting renewable energy in Cuba. Despite the longstanding tensions between the countries, there is opportunity for cooperation especially in the less politically fraught realm of scientific and climatic expertise.

Havana, Cuba, 25 August 2016 - The government of Cuba and the International Renewable Energy Agency (IRENA) are holding a workshop on approaches to operating and planning electricity systems with higher shares of variable renewable energy in the island nation of Cuba. Taking place in Havana from the 24th to 26th of August, with the support of the German ...
