Solar energy for Afghanistan means: reliable electric power supply without negative environmental influences such as noise and stench by generators - and solar power systems already ...

Solar Inverters A solar inverter is the most sophisticated part of any grid-tie solar system and unfortunately, it is also the part most likely to have issues. This is not surprising considering string inverters are generally located outside under harsh weather conditions including rain, humidity and extreme heat, all while generating thousands of watts of power for up to 9 hours a day.
