Can Guinea Bissau use solar energy?

Table 1: Solar insulation in a horizontal plan in Guinea Bissau With a yearly average of over 5.8 Kwh/m²/day (table 1), GB should be able to take advantage of all solar energy applications.

Are there wind turbines in Guinea Bissau?

Unfortunately, none were counted in Guinea Bissau. According to the current General Director of Energy in GB Eng. Fernando Benício no electrical wind turbines have been installed in GB and there are no projects in this area for the near future. Some few windmills have been spotted in some remote areas in GB but they are no longer working.

Is biomass a source of electricity in Guinea-Bissau?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Guinea-Bissau: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Does Guinea-Bissau have offshore exploration potential?

The underlying offshore exploration potential of Guinea-Bissau has long been recognized given the country's functional hydrocarbon system, good potential reserves, and several drillable prospects in a vast shallow water shelf setting.
