

Are there microgrids in the old revolutionary base areas

Do old revolutionary base areas in the east have a coordinated development?

Although most of the old revolutionary base areas in the east display the coordinated development of the economy, society, and environment, the degree of coordination is not particularly high, and there are still some old revolutionary base areas in the central and western regions with uncoordinated development.

Why do old revolutionary base areas lag behind other regions in economic development?

Due to differences in geographical location, resource allocation, and industrial structure, old revolutionary base areas lag behind other regions in economic development and face challenges in economic transformation, industrial upgrading, and other aspects.

Are old revolutionary base areas sustainable?

According to Table 4, we find that the sustainable development of the old revolutionary base areas has generally shown an upward trend in the past, while in recent years, it has fluctuated and declined. Heat map of sustainability scores Changes in the dimensions of sustainability in old revolutionary regions

How can old revolutionary base areas improve a new development stage?

Efforts should be made to support old revolutionary base areas in consolidating and spreading anti-poverty achievements in the new development stage, creating a wealthier and happier life for local people, according to a circular issued by the State Council on Feb 20.

Will the old revolutionary base areas be a priority?

“Just like the poverty alleviation campaign, the old revolutionary base areas will remain a priority in the nation's common prosperity drive, and more work must be done to make the public services more equitable and lift the people's living standards to a higher level,” she said.

What should be done in old revolutionary base areas?

In old revolutionary base areas, coordinated development should be pursued among small, medium-sized and large cities. Demonstration zones of high-quality development should be further developed in cities such as Ganzhou in Jiangxi province and Sanming in Fujian province, the circular said.
