

Aruba smart energy geeks

What is smart community Aruba?

The planned activities within Smart Community Aruba are structured into eight research areas, in which the consortium partners will conduct research together ('shared research'). In Smart Community Aruba affordable and sustainable building solutions will be tested, which will lower...

How much energy does Aruba consume annually?

Aruba has an annual consumption of 990 gigawatt-hours (GWh). Currently, about 13% of its generation comes from a 30-MW wind project and 0.9% comes from waste-to-energy (WTE) biogas. An additional renewable capacity of 34 MW is planned or in progress. Aruba's installed generation capacity is 230 megawatts (MW) with an average load of 100 MW.

Does Aruba use ice for building cooling?

Aruba's utility installed a pilot ice storage cooling system that makes ice at night when electricity costs are lower. Ice is then used the following day to cool buildings instead of traditional air conditioning. Currently, Aruba gets 15.4% of its electricity from renewable sources.

Does Aruba aim for sustainable development?

Aruba has announced its commitment to sustainable development, as stated in the 2011 document titled 'The Green Gateway'. During the Rio +20 United Nations Conference on Sustainable Development in 2012, the country declared its goal to achieve 100% renewable energy use by 2020.

How much wind capacity does Aruba need?

Aruba's 30-MW wind project at Vader Piet currently produces 13% of Aruba's load requirements, with an additional 26.4 MW slated to come online in late 2015. WEB Aruba aims to add 3 MW to 6 MW to the biogas plant, with a goal of using 70% of household waste. Therefore, Aruba needs more wind capacity to meet its energy demands.

Is Aruba a fossil fuel island?

Aruba remains dependent on imported fossil fuels, as more than 80% of the island's electricity is generated using heavy fuel oil. This leaves Aruba vulnerable to global oil price fluctuations that directly impact the cost of electricity.

So, design became energy-efficient design, and Beauchemin Designs morphed into Energy Geeks[®], which today serves Rhode Island, Massachusetts and Connecticut, has a dozen employees, and provides services like air sealing, weatherization, blower-door testing, and duct-leakage testing. ... Smart, hard workers who know their trade. Energy Geeks. 5 ...
