

# Azerbaijan once human energy storage

How can Azerbaijan improve energy security?

Diversifying and improving the energy capacity of the country to ensure energy security. Azerbaijan has significant untapped renewable energy potential, as it is a relatively sunny and windy country, and it also has sizeable hydro, biomass and geothermal resources.

What is Azerbaijan's energy potential?

According to the Ministry of Energy, the country's technical potential for small hydro is 520 MW, which could generate up to 3.2 TWh annually. Azerbaijan's Renewable Energy Agency under the Ministry of Energy (formerly SAARES) states that the country has up to 800 MW of geothermal energy potential.

What is Azerbaijan's potential for small hydropower?

Although hydropower is Azerbaijan's largest source of renewable energy today, its potential has not been fully exploited. According to the Ministry of Energy, the country's technical potential for small hydro is 520 MW, which could generate up to 3.2 TWh annually.

How has Azerbaijan diversified its economy?

While Azerbaijan has begun to diversify its economy, for example by investing in the development of renewable energy, Baku also remains committed to hydrocarbon production.

How much CO<sub>2</sub> does Azerbaijan emit?

The latest official GHG emissions figures are from 2017, when emissions were 38% below 1990 levels and the energy sector accounted for 75% of total emissions. According to the most recent IEA data, in 2017 Azerbaijan's CO<sub>2</sub> emissions from fuel combustion amounted to 30.9 Mt (+6.6% since 2005; -42.1% since 1990).

How can Azerbaijan generate electricity from biomass?

Rapid growth in industry, agriculture and social services in Azerbaijan is creating new opportunities for electricity generation from biomass derived from combustible industrial waste, forestry and food processing waste, agricultural waste, and other biological substances. The Ministry of Energy estimates technical potential of 380 MW.
