How much energy does Bahrain need?

In order to achieve these objectives, Bahrain will need 280 MW of electricity generation capacity from renewables by 2025, increasing to 710 MW by 2035. According to the Sustainable Energy Authority (SEA), the country is targeting solar, wind and energy from waste to hit these targets.

Is Bahrain an energy importer?

Bahrain is a net energy exporter. It was the first place on the Arabian side of the Persian Gulf where oil was discovered, and the First Oil Well, located below Jabal al Dukhan, has operated since 1932. Primary energy use in Bahrain was 110 TWh and 139 TWh per million persons in 2009, and 107 TWh and 139 TWh/million people in 2008.

Does Bahrain have solar energy?

Given Bahrain's climate, solar energy is a vital part of the kingdom's clean energy mix, accounting for 93% of its renewable capacity in 2020. In November 2021 the government inaugurated the Batelco solar plant, which can produce some 1600 MW of power and is expected to reduce the country's carbon emissions by around 900 tonnes.

How is Bahrain navigating the energy transition?

Bahrain, known as the birthplace of the Arabian Peninsula's oil industry, is navigating the challenges and opportunities of the energy transition. While focusing on renewables production, energy efficiency and sustainability, the kingdom is also leveraging its remaining hydrocarbons resources.

Does Bahrain have a hydrogen industry?

Bahrain has taken its first steps to develop a domestic hydrogen industry. In November 2020 the kingdom signed an agreement with hydrogen producer Air Products to assess the potential development of a hydrogen economy in the country. The SEA unveiled plans for a 4-MW green hydrogen plant in December 2021, which would be a first for the region.

The Energy Sector Skills Report was developed through a comprehensive methodology, including international benchmarking, adherence to International Labour Organization guidelines, and a series of sector working group sessions to gain deep insights into the specific needs and dynamics of Bahrain's Energy sector.

Bahrain's Energy Security and Environmental Sustainability scores have improved since 2010 as a result of new oil and gas discoveries and the diversification of energy sources. Bahrain's Energy Equity performance gets the highest scores as it has done over the last decade, reflecting accessible and affordable energy. Bahrain's balance grade is ...

According to official sources, Bahrain's energy efficiency will improve as government ministries implement the NEEAP, primarily through a new green building code permit for all new construction. Bahrain will have to produce 280 megawatts of electricity from renewables by 2025, increasing to 710 megawatts by 2035, to meet the country's ...

To reach this target, Bahrain aims to produce 710 MW from renewable sources by 2035. Bahrain's Sustainable Energy Authority was created in 2019 to oversee efficient energy policy and promote renewables in the energy mix. The entity is targeting solar, wind and waste-to-energy facilities to achieve its goals.
