I've got a whole house battery backup, I love it. I went with Generac (cheaper than Tesla, equal or better reliability). Pros: ... You could probably buy 3+ generators compared to 1 battery bank sufficient enough to power part of a home. Really though, I would try to get a happy medium and go for an inverter generator (gasoline or propane ...

There are 2 parts of the battery backup system: the inverter and battery bank. But it's the batteries that are the most expensive component of the system. A large battery bank quickly makes the cost-effective use of solar a moot point. To help manage costs and keep within a budget, you have to define exactly what loads you want on backup.

Best high-capacity portable power station. The Anker Solix F3800 is an impressive power station with a 3840Wh battery capacity. It might be pushing the definition of "portable" a bit far - it's a ...
