

What is Eoly & Fluxys doing in Belgium?

Eoly, part of Colruyt Group, Fluxys and Parkwind have set up a collaboration to boost the sustainability of the energy landscape in Belgium. The ambition is to build an industrial-scale power-to-gas installation that converts green electricity into green hydrogen that can be transported and stored in the existing natural gas infrastructure.

Why did Korys acquire Virya Energy?

Halle, 26th March 2024 - Korys reaches a 70% stake in Virya Energy through the acquisition of an additional 30% from the Colruyt Group. With a larger stake in the shareholder structure, Korys wants to give Virya Energy the opportunity to pursue its ambitious global growth plans in sustainable hydrogen, wind, solar, and e-mobility.

What is energy in Belgium?

Energy in Belgium describes energy and electricity production, consumption and import in Belgium. It is governed by the energy policy of Belgium, which is divided between several levels of government.

Who produces electricity in Belgium?

Electrabel is the main producer of electricity, followed by EDF Luminus. Short term trading is done via the Belpex energy exchange, which is now part of APX-ENDEX. The Belgian transmission grid, operated by Elia System Operator, has a central position in the Synchronous grid of Continental Europe.

What is Belgium's energy policy?

It is governed by the energy policy of Belgium, which is divided between several levels of government. For example, regional governments are responsible for awarding green certificates (except for offshore wind parks) while the national government is responsible for all nuclear power.

Why did Korys buy Colruyt?

This strategic transaction, based on an equity value of approximately EUR 600mil, underscores Korys' commitment to fostering innovation and driving sustainable development in the energy sector. Korys now holds a 70% ownership interest, while the Colruyt Group retains a 30% stake.

Belgium's first commercial nuclear power reactor began operating in 1974. The country also operates a research reactor at the Belgian Nuclear Research Center (SCK CEN). Nuclear power is an important source of Belgium's energy even though its relative share in the country's energy mix is tending to decline in favor of gas and renewables.

Tenka Power excels in PV scenarios, offering high-performance inverters suitable for various business needs. Our solutions ensure maximum energy efficiency, durability, and user-friendly operation. Tenka Power hybrid inverters offer advanced technologies like 3-phase emergency power and peak load shaving, and can be connected plug-and-play to a PV battery.
