

"Drax performed strongly in 2023 and we remained the single largest provider of renewable power by output in the UK. We have created a business which plays an essential role in supporting energy security, providing dispatchable, renewable power for millions of homes and businesses, particularly during periods of peak demand when there is low wind and solar power.

Opus Energy is Drax's supply business that specialises in servicing small and medium-sized enterprises. Electric vehicles and energy services Drax's Electric Vehicle (EV) team offers end-to-end EV support for commercial fleets, from vehicle and charging station selection to installation, data analysis and fleet performance improvements.

Drax Energy Solutions; Elimini; Opus Energy; Community engagement; The role of biomass in securing reliable power generation & Sustainability. We're building for a sustainable future in how we source our biomass, generate energy, remove carbon dioxide and function as a ...

The UK has decarbonised its energy system at a quicker rate than any other country, but having done "the easy bit" and with demand for electricity forecast to increase by 50% by 2035, we are now at an inflection point.. Additionally, leading thinktank Public First's research shows that in 2028 the UK is on course to hit an energy security "crunch point" - with peak ...

renewable energy and decarbonisation agendas. 100% of the electricity procured and supplied by Drax during the 2020-2021 Ofgem reporting year was from renewable sources. For more information, see from page 49 of the 2021 Drax Group Annual report and accounts. Drax is an active participant in the communities in which it operates.
