How do I choose the best home battery backup system?

**Space Requirements:** Homeowners need sufficient space for both the battery unit and, if applicable, solar panels. Space constraints may impact the feasibility of installing such systems, especially in smaller residences. Choosing the BEST home battery backup system is not easy.

What is a home battery backup system?

Home battery backup systems, like the Tesla Powerwall or the LGES 10H and 16H Prime, store energy, which you can use to power your house during an outage. Batteries get that electricity from your home solar system or the electrical grid. As a result, they're much better for the environment than fuel-powered generators.

How many kWh does a battery backup system store?

Comparatively, partial-home battery backup systems usually store around 10 to 15 kWh. Given that power outages are infrequent in most parts of the country, a partial-home battery backup system is generally all you'll need. But, if your utility isn't always reliable for power, whole-home battery backup may be the way to go.

Why do you need a whole-home battery backup system?

Whole-home battery backup keeps things business as usual during power outages. Why trust EnergySage? What are the best batteries for whole-home backup? Installing a whole-home battery backup system means you won't need to break out the candles or worry about keeping the refrigerator closed during power outages.
