The company, headquartered in San Jose, California, is growing quickly and looking to add to its dynamic team. Stay up to date with Bloom Energy through our social channels.

Is Bloom Energy a winning product for AI's electricity needs?

Bloom Energy scored a massive customer win that will greatly expand its business. The announcement came on the back of third-quarter earnings. Bloom's fuel cell servers look like a winning product for AI's electricity needs. Shares of Bloom Energy (BE -1.22%) rocketed 185.9% in November, according to data from S&P Global Market Intelligence.

Is Bloom a pricey stock?

Bloom looks pricey, but is it? Bloom looks very expensive today at a \$6 billion market cap since it's not profitable and trades at roughly 70 times next year's adjusted earnings estimates, which have recently been increased to reflect the AEP deal.

How much energy will AEP get from Bloom?

The agreement goes up to 1 gigawatt (GW) of energy, which would be the largest procurement of fuel cells to date and nearly as much as the 1.3 GW Bloom has provided over the course of its entire existence. As part of the deal, AEP has already placed 100 megawatts (MW) of orders for this year, with more expected in 2025.
