A quarter of the electricity generated in Bolivia comes from renewables although 12% of the population still does not have access to electricity, according to the IEA. The government has launched the Bolivia Electric Plan 2020-2025 to support the expansion of the electricity grid with a strong emphasis on renewables.

We are an indigenous engineering organization, incorporated in 1993; one of our major lines of business is in the design, supply, and installation of power solution systems such as Inverter, Hybrid solar or Standalone solar power solution systems as alternative source for constant electricity supply.

Once there are a significant number of electric cars with batteries there will be a market for a wide variety of base energy sources (solar, wind, geothermal, nuclear, tidal, hydro, coal, natural gas, waste incineration, etc., as well as the regenerative capabilities in the vehicles themselves which is virtually impossible with an ICE).

With over 500 MW of operational ground-mounted solar parks and an ambitious target of 5 GW by 2028,
