You may produce free solar power with the help of our 6 kW hybrid solar system. A 6KW solar panel system can reduce your monthly power cost to around zero. You may also sell WAPDA/KSE any additional green ...

Overview of the 6kW Solar System. The 6kw solar system is the best option for homes that consume 700 to 800 units of electricity per month. A 6 kilowatts solar panel system consists of panels, battery inverter and wiring. By using it, electricity costs are reduced to a great extent. Its installation costs are also very low.

Batteries will increase solar system costs by between \$10,000 and \$20,000 in most cases, so this is an important consideration to make when sizing your system and deciding what components you want to be installed. Note: This is just a simplified example -- the exact kWh retail price and solar feed-in tariff will depend on your electricity plan.
