

The ESO emphasises the necessity for funding to connect new power sources such as solar and wind farms to the grid and ensure their electricity can be transported nationwide. With Scotland's Crown Estate granting leases for 28GW of capacity, Scotland is poised to produce more than five-times its current peak winter demand of 5GW by 2035.

Three solar power box systems are set to be installed across the British Virgin Islands, following a signed Memorandum of Understanding (MOU) between the Recovery and Development Agency (RDA) and the United Kingdom, which was facilitated by the Governor's Office. The MOU is valued a total of \$260,000 and was signed on November 1, which ...

The renewable energy developer has launched public consultation on early-stage proposals for a 500MW solar development co-located with a battery energy storage system (BESS) that could have up to 500MW output. The East Pye Solar project will be situated on 1,100 hectares of land south of Norwich and north of Harleston.

The UK energy grid, which was first created in 1935 to transmit power from coal-powered plants around the country, must adapt to the era of renewable energy - and fast, if the UK wants to play a ...
