### Build a roof under photovoltaic panels

Can a solar panel be installed on a roof?

If you wish to install a solar panel on your roof building regulations will normally apply. The ability of the existing roof to carry the load (weight) of the panel will need to be checked and proven. Some strengthening work may be needed. Building regulations also apply to other aspects of the work such as electrical installation.

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

How much does a solar roof cost?

Solar roof tiles are considerably more expensive than solar panels. A 4 kilowatt solar roof will cost between £12,000 and £16,000,compared to around £6,500 to £8,000 for a 4 kilowatt solar panel system,so at least half the price of a solar roof.

Can solar tiles be installed on a new roof?

It is not possible to integrate them into an existing roof, so they usually have to be installed in the roof of a new build or where the roof is being completely replaced for some reason. Generally, solar tiles are less efficient than solar panels, with an efficiency of 10-20% compared to 16-22% for most solar panels.

How much weight can a solar roof hold?

Installers must only fit solar panels if they're sure your roof can hold their weight, and carry on doing so for up to 40 years. Fortunately, most roofs in the UK are built to hold much more than a solar panel system, which usually weigh around 20kg per square metrewhen everything's included.

Are solar roof tiles better than solar panels?

A roof has to have a perfect pitch and angle in order to be suitable for solar tiles installation, whereas solar panels are much easier to install on 'difficult' roofs. Solar thermal is not yet available in the form of solar panels. Are solar roof tiles more expensive? Solar roof tiles are considerably more expensive than solar panels.

Installers must only fit solar panels if they"re sure your roof can hold their weight, and carry on doing so for up to 40 years. Fortunately, most roofs in the UK are built to hold much more than a solar panel system, which ...

Integrated solar panels are installed within the structure of your roof, rather than on top of its tiles like regular solar panels. Installing integrated solar panels for an average 3-bedroom home ...
