

Why is Burkina Faso launching a solar power plant in Komsilga?

Loading... In a significant step towards enhancing electricity supply and sustainable development, Burkina Faso signs an agreement for a 50 MWp solar power plant in Komsilga. The initiative, led by the Minister of Energy and Energie Plus, aims to fortify renewable energy contributions, fostering economic growth and improved access to electricity.

Where is the new solar energy plant located in Burkina Faso?

Located some 250km south east of the nation's capital city of Ouagadougou, near the town of Pâ, the new solar energy plant will supply all the electricity it produces to Burkina Faso's national power utility, La Société National D'électricité Du Burkina Faso (SONABEL).

Why does Burkina Faso need electricity?

The country has one of the world's lowest rates of electrification. Because of a shortage of installed energy generation capacity, Burkina Faso needs to import electricity from neighbouring states. Urbanisation, structural changes to the economy and recent strong GDP growth have increased demand for energy.

Why is Burkina Faso a poor country?

Burkina Faso has a population of nearly 20 million people. Over 40% of people live below the poverty line. The country has one of the world's lowest rates of electrification. Because of a shortage of installed energy generation capacity, Burkina Faso needs to import electricity from neighbouring states.
