What factors affect health service use in Burkina Faso?

This study provides evidence on the health status and socio-demographic factors associated with health service use in Burkina Faso. The morbidity data from the household survey show that the main health problem in Burkina Faso is malaria. The high malaria morbidity is confirmed by the health management information system (HMIS) reports.

How does Chisu support the government of Burkina Faso?

CHISU supports the Government of Burkina Faso to improve disease surveillance (including COVID-19 and malaria surveillance) and the use of health information by strengthening health information systems (HIS)--including One Health and routine health information systems.

How has Burkina Faso reformed its health system?

Burkina Faso has undertaken major reforms, the cornerstone of which has been the decentralization of the health system to increase access to primary healthcare and to increase the effectiveness, efficiency, financial viability and equity of health services.

Do women pay more for maternal health services in Burkina Faso?

A national survey on out-of-pocket payments for maternal healthcare indicated that the amounts paid by women were higher in urban areas [16]. The study findings showed poor access and inequality in health services utilization in Burkina Faso where the UHC policy was accepted throughout the government and the health system.

What can Chisu do for Burkina Faso?

CHISU will further improve the analysis and use of routine and aggregate health surveillance data from the three One Health ministries and assist these ministries to respond to public health events in Burkina Faso.

Does Burkina Faso have inequitable access to healthcare?

The study contributes to a further exploration and explanation of the inequitable access and use of healthcare in Burkina Faso. The study could be useful for policy in Burkina Faso when assessing the reform progress as well as for other countries in the region that struggle with problems in healthcare access.

The Burkina Faso Livestock Sector Development Support Project (PADEL B) has enabled: 392,850 livestock farmers to benefit from agricultural goods and services in livestock value chains; ... targets the most vulnerable households and aims to lay the foundations for a social protection system. It has achieved the following results:

Citizens of Burkina Faso are known as Burkinabé; and its capital city is Ouagadougou. In 2017 the country's population was over 20 million and before being renamed Burkina Faso, it had been called the
