

The US renewable energy industry has the wind at its back. Significantly expanded climate and clean energy incentives within recently passed legislation have breathed tremendous life into green projects. Societal pressure on businesses to reduce emissions continues to accelerate every year, adding to the industry's progress.

On 4 September 2024, the government of the Republic of Cabo Verde, the European Union and the European Investment Bank (EIB) announced the signature of new financing totalling EUR300 million to back the strategic digital, port and renewable energy sectors in the country. This decision falls under the European Union's Global Gateway strategy in Cabo Verde.

Cape Verde aims to get 50% of its electricity from renewable energy resources by 2030 and 100% by 2050. This coincides with aims to bring down energy import costs and help the environment by reducing greenhouse gas emissions. The country has integrated wind and solar in its energy system. It also has the potential to utilize emerging technologies as ocean thermal energy conversion.

On 4 September 2024, the government of the Republic of Cabo Verde, the European Union and the European Investment Bank (EIB) announced the signature of new financing totalling EUR300 million to back the strategic digital, ...
