Cairo Solar cofounder Hatem Tawfik put it bluntly: it'll be private sector projects driving renewables in Egypt from now on. Solar writ small. The government is also betting on small players. It had promised a deliciously high FiT rate in its first ever renewable energy round of 14 cents/kilowatt hour (kWh) for utility projects of 20-50MW.

meet 50% of American Samoa's energy needs from renewable resources by 2025 and 100% by 2040. However, as of 2023, only around 3% of American Samoa's energy needs are being met by renewable resources. The other 97% of American Samoa's energy needs are provided for via imported diesel fuel that is used to power generators.

Three things are bound to happen if you install solar panels on your roof: you reduce your electricity costs altogether, save more money, and generate renewable energy that can help the climate and the country as a whole. In the next few years, the demand for energy will rise as the population grows, putting extra
