

# Can photovoltaic panels block the next door

Can solar panels stop development next door?

Obtaining planning permission can be fraught with difficulties. This case highlights just one of them and possibly opens the way for people to install solar panels not just to generate electricity but to possibly stop development next door.

Do solar panels affect neighbours?

However, specific conditions and limitations are in place to ensure that solar panel installations do not negatively impact neighbours or the local environment. Neighbours have the right to object to solar panel installations if they believe the installation does not comply with the relevant regulations.

Are solar panels bad for Your Neighbourhood?

Visual impact: Neighbours may be concerned that the solar panels will be unsightly and reduce the aesthetic appeal of the neighbourhood. Loss of sunlight: Neighbours may be concerned that the solar panels will block sunlight from reaching their property, potentially affecting their plants or garden.

Why do neighbours oppose solar panels?

The location and size of solar panels are two key factors that can lead to objections from neighbours. Solar panels should be sited to minimise their visual impact on the local area and not exceed certain size limitations. For example, solar panels should not protrude more than 200mm (about 7.87 inches) from the roof's surface.

Can a neighbour object to a solar panel installation?

If your installation falls within certain parameters, your neighbours won't have any grounds to object. However, if your installation falls outside these parameters, your neighbours may have valid reasons for objection. There are certain parameters that solar panel installations must adhere to in order to be considered a 'permitted development.'

Are solar panels a 'permitted development'?

There are certain parameters that solar panel installations must adhere to in order to be considered a 'permitted development.' These parameters include: The solar panels must not protrude more than 200mm from the surface of the roof, or more than 1m above the highest part of the roof (excluding chimneys).
