

What is a modular vertical lift system?

The Modula automated vertical lift system is fully modular and can be customized with different drawer widths, heights and capacities. The Modula WMS software will also help to optimize part placement within a tray, as well as recommend a drawer to use.

What is a modular storage system?

Modula is an automated vertical storage system with a series of trays which is designed to optimise space, work and warehouse management. It is the ideal solution for issues surrounding the management, picking and retrieval of components, as well as semi-processed and finished products, in a diverse range of industries and applications.

Why should you choose a warehousing automation company in Canada?

As a leading Warehouse Automation Company in Canada, we pride ourselves on offering cutting-edge technologies that optimize efficiency, streamline operations, and boost productivity for businesses across Canada. With the ever-increasing demands in the logistics and supply chain sectors, traditional warehousing methods no longer suffice.

What is a Modula vertical storage carousel?

The Modula vertical storage carousel is ideally suited for high-turnover production parts as well as indirect-cost items such as tools, raw materials, and supplies. Handling large quantities of low-cost materials generally involves high logistic costs.

How does a vertical lift module work?

How It Works? A vertical lift module (VLM) is an enclosed system of vertically arranged trays, an extraction platform and a series of computerized controls that delivers goods to an ergonomically positioned workstation where an operator picks or replenishes the goods.
