Who is cellcube?

CellCube intends to be a fully integrated producer of vanadium, vanadium electrolytes and vanadium redox flow batteries for the Energy Storage Market. We put 15 years of research and development into the CellCube to provide you with a top-notch energy storage system.

Who is cellcube energy storage system?

Correct, CellCube Energy Storage System Inc. is a vertically integrated energy storage system provider. We are in the process of setting up the vanadium mine to produce all-vanadium electrolyte for the use in CELLCUBE flow batteries, exclusively.

Who makes cellcube batteries?

About CellCube - Enerox GmbH Under its trademark 'CellCube' the US and Austrian based Enerox GmbH develops, manufactures and distributes Vanadium Redox Flow Batteries. 'VRFB's are sustainable, long-duration energy storage systems, improving and securing the consumption of energy from renewable sources.

What is a cellcube battery?

The first CellCube batteries were installed in 2008 and with a decade of operational experience the technology has been proven to deliver long lasting energy storage infrastructure for deployments in a wide range of climates and heavy load applications.

Why should you choose a cellcube?

Based on the vanadium redox flow technology, the CellCube allows for a clean, emission-free and fast energy supply at all times. A stable power supply, in combination with renewable energy sources, is ensured at all times and in every climate zone. The use of vanadium electrolytes increases the safety and battery life.

What is a cellcube used for?

With its simple and independent scalability in power output and storage capacity, the CellCube is already over 130 units in operation for individual industrial applications, to even out load peaks, for e-mobility solutions, for off-grid applications and for microgrid power supply in regions without a stable power grid.
