Solar Pro. designs, manufactures, and installs reliable self-sustaining charge regulator for solar panels Moldova for village electrification in faraway areas from the main electricity grid, to commercial estates.

A solar cell functions similarly to a junction diode, but its construction differs slightly from typical p-n

junction diodes. A very thin layer of p-type semiconductor is grown on a relatively thicker n-type semiconductor. We then apply a few finer electrodes on the top of the p-type semiconductor layer.. These electrodes do not obstruct light to reach the thin p-type layer.
