What is the solar PV installed capacity in Colombia?

The solar PV installed capacity in the country has increased significantly in recent years. According to the International Renewable Energy Agency 2024, the installed solar PV capacity grew by more than twofold. The installed solar PV capacity in Colombia reached 676 MW in 2023.

Is solar a competitive technology in Colombia?

While there are no formal government support schemes for solar, with the government seeing it as a competitive technology, Colombia offers tax breaks for companies that deploy renewables in the country and, similar to Brazil, there is no VAT added to solar imports, helping to drive deployment in a country with little to PV manufacturing.

When will Colombia's solar projects start?

"In their second auction (November 2021), Colombia awarded around 800 MW of solar and projects must start delivering power in January 2023," says Ellis. "As a result, we expect to see bumper new additions of over 1 GW in the period 2022-23, pushing total forecast new capacity to 1.5 GW through 2024.

How much solar power does Colombia have in 2024?

In February 2024, the Government of Colombia announced that it had awarded 4.4 GW of solar PV capacity, which accounted for 99% of all renewable generation capacity offered in its latest auction.

What is Colombia's energy mix?

Recently, hydropower has been the dominant source in Colombia's energy generation mix, accounting for over 70% of the total share. Additionally, the country has a significant proportion of gas power generation, representing approximately 11% of the overall energy mix.

The demand for solar energy is growing fast as the climate crisis worsens. In 2023, 447 GW of new solar PV capacity was installed worldwide--an 87% jump from the previous year. This unprecedented growth ...

What is the importance of Solar Marketing? Marketing is an important component of any business, and the solar industry is no exception. The goal of marketing in the solar sector is to raise awareness about the benefits ...
