

Comoros lead lined cabinet

What is a marshield lead lining cabinet?

MarShield manufactures a wide range of Standard or Custom Designed Lead Lined Cabinets suitable for Nuclear Medicine or Radiochemistry laboratories.

What are lead lined cabinets?

IMPORTANT NOTE: Our lead lined cabinets are an industrial custom fabricated design using lead that is a heavy material which does not allow for the type of fine finish you might expect in other light weight, mass produced laboratory furniture.

Who makes custom lead lining laboratory furniture?

With 40 years of experience with custom lead furniture our attention to detail shows every step of the process from the moment your order is entered until it arrives at your doorstep. MarShield manufactures a wide range of Standard or Custom Designed Lead Lined Laboratory Furniture suitable for Nuclear Medicine or Radiochemistry laboratories.

Why should you choose a lead shielding cabinet?

Our cabinets come with customizable lead shielding options to meet stringent safety standards. Designed for functionality, they feature key-locking security, label slots for easy identification, and are built to withstand up to 1,500 lb, ensuring a secure, compliant solution for all your radiological needs.

The top shelves conveniently store syringes, syringe shields, and other small items. This cabinet is completely shielded on all six sides with .25", .5", and 1" lead, and can stand alone or be grouped with other cabinets. All cabinets in this product line are built to the industry standard height of 36.5".
