How can a Bess consortium benefit low-income countries?

Renewable sources of energy with a combination of BESS are cheaper than fossil fuel power plants. As a multi-stakeholder partnership, the BESS consortium can bring the benefits of energy storage to low and middle-income countries.

Which countries have joined the Bess consortium at the 2023 COP28?

Eleven countries, including India, Egypt, and Kenya, have joined the BESS Consortium at the 2023 COP28, being held in Dubai.

What is the Bess consortium?

The BESS Consortium is a multi-stakeholder partnership set up to ensure these BESS benefits transform energy systems across low- and middle-income countries (LMICs). The Consortium is on track to meet its target of securing 5 GW of BESS commitments by the end of 2024 and deploying these by the end of 2027.

Is the Republic of the Congo a member of the African Union?

The Republic of the Congo is a member of the African Union, the United Nations, La Francophonie, the Economic Community of Central African States, and the Non-Aligned Movement.

Is Congo a Marxist state?

It was a Marxist-Leninist state from 1969 to 1992, under the name People's Republic of the Congo (PRC). The country has had multi-party elections since 1992, but a democratically elected government was ousted in the 1997 Republic of the Congo Civil War.

What is Bess & why is it important?

BESS is a critical element in the deployment of renewable energy sources that are intermittent, such as sunshine, and can help increase grid reliability. How well do you really know your competitors? Access the most comprehensive Company Profiles on the market, powered by GlobalData. Save hours of research. Gain competitive edge.

The Democratic Republic of the Congo [b] (DRC), also known as DR Congo, Congo-Kinshasa, or simply Congo, is a country in Central Africa. By land area the country is the second-largest country in Africa and the 11th-largest in the world .
