

Corab also offers a three-phase hybrid inverter which can successfully combine a photovoltaic installation, an energy storage unit, and household equipment. It is characterised by asymmetric operation of up to 50% of the nominal output power per phase, and features an option of oversizing by up to 150%.

The project will combine a solar PV array with a battery energy storage system. The document said its expected net capacity during off-peak hours will be 200MWac and is not to exceed 230MW, measured at the delivery point. During peak hours, the project is expected to provide around 400MWh of energy from the BESS.
