

What is Croatia's energy strategy?

In February 2020, the Croatian government adopted a new Energy Strategy for the period until 2030, with an outlook through 2050. The Strategy includes a wide range of energy policy initiatives that will improve energy security, increase energy efficiency, lower dependence on fossil fuels, increase local production and increase renewable resources.

How can Croatia become energy-independent and sustainable?

In order to become energy-independent and sustainable, Croatia counts on its abundant renewable energy resources. In February 2020, the Croatian government adopted a new Energy Strategy for the period until 2030, with an outlook through 2050.

Is Croatia a Good Energy Gateway?

"Croatia has a good chance to be the energy gateway for a number of neighbouring central European countries in the current energy geopolitical situation and difficulties of energy imports from Russia," said Igor Dekanic, a professor at the geology and mining faculty of Zagreb university.

Does Croatia have geothermal power?

Croatia also has high potential in geothermal power, with six active exploration projects for electricity and heating plants in central and eastern Croatia. These regions, located in central Europe's Pannonian basin, have an average geothermal gradient 60% higher than the European average.

Could Croatia have been a regional oil and gas import hub?

Croatia could have already assumed a much bigger role as a regional oil and gas import hub had it not delayed and scaled back the construction of its LNG terminal for a decade, said András Simonyi, an energy expert at the Atlantic Council's Global Energy Center. "The Croats are very late," Simonyi said.

Does Croatia have a nuclear power plant?

Croatia has no nuclear power plants on its territory, but co-owns the Krsko Nuclear Power Plant together with Slovenia. The Krsko plant was built in the era of Yugoslavia on the territory of present-day Slovenia. Planned decommissioning is by 2043.

Renewable energy in Croatia (click on the map to view a PDF version) In 2021, Croatia's wind farm park increased significantly as three large new wind farms were put into operation. Senj wind farm has a capacity of 156,000 kW and was built with the help of investments from the Chinese company Norinco [16]. Wind farm Padjene with a capacity of ...

Energy cost estimates are highly dependent on these assumptions so published cost figures can differ substantially. The presence of wind energy, even when subsidized, can reduce costs for consumers (EUR5 billion/yr in Germany) by reducing the marginal price, by minimizing the use of expensive peaking power plants. [93]
