

CuraÃ§ao solarplay power station

What are solarplay portable power stations?

SolarPlay portable power stations are high-performance products, developed by our dedicated production plant and scientific researchers. SolarPlay has reliable products for outdoor adventures and backup power.

Can the solarplay power station be charged with a third-party solar panel?

A: The SolarPlay power station can be charged with a third-party brand solar panel. You must match the plug size and input voltage of the SolarPlay power station you want to charge. For example, the third-party solar panel for the SolarPlay Q2501 should have the following specifications:

How much power does the solarplay portable power supply have?

[Adjustable input power and convenient to carry] The Solarplay portable power supply offers five adjustable input power levels: 300W, 500W, 700W, 900W, and 1100W. It can be charged according to the usage environment and charging needs, ensuring optimal performance.

Does solarplay work with a generator?

SolarPlay power station is compatible with AC adapters and solar panels (11.5V to 48V, max. 500W), car cigarette sockets (12V/24V), and generators. We recommend using the Solarplay solar panel 200W with it. The built-in battery uses a lithium iron phosphate battery (LiFePO₄) that lasts 15 years with over 3500 charge/discharge cycles.

What appliances can a solarplay power supply work with?

The device can be used with most electrical appliances with an output of 2000W, including electric blankets, laptops, hair dryers, electric kettles, and microwave ovens. [Adjustable input power and convenient to carry] The Solarplay portable power supply offers five adjustable input power levels: 300W, 500W, 700W, 900W, and 1100W.

How many USB ports does a solarplay solar panel have?

It can be used with the Solarplay solar panel 200W. This device can charge and supply 14 devices simultaneously. It features four AC ports, two USB-A (QC3.0) ports, three USB-C (PD 20W) ports, one USB-C (PD 100W) port, one cigarette lighter port, two DC5521 ports, and one XT60 port.

[Adjustable input power and convenient to carry] The Solarplay portable power supply offers five adjustable input power levels: 300W, 500W, 700W, 900W, and 1100W. It can be charged according to the usage environment and charging ...

SolarPlay's technology enables dual charging, so it can be fully charged in about 1.5 hours despite its large capacity. It can be fully charged in about 1.8 hours at 1100W, which is much faster than other products. ...
