

What is a Teknoware central battery system?

Teknoware's range of central battery systems starts with small systems containing just a few dozen luminaires and a single central battery unit up to centrally controlled systems containing thousands of luminaires.

Do Teknoware luminaires need separate data cabling?

The testing of the luminaires is based on individual addresses, and the communication is by means of the power supply cables. Thus, there is no need for any separate data cabling between the luminaires. The luminaires must be addressable, of the Teknoware products with the letter K in the end, or they must have a separate address module.

Where are the central battery systems made?

All our central battery systems and their components, as well as all the accessories and spare parts related to these systems, are designed and manufactured in our own factory in Finland. The central battery systems are always made to order, according to the needs of the customer.

The central battery system is compatible with all of our 230 V addressable luminaires so you can replace an existing system with ease. The TKT7 series is an easy to adapt solution for locations which need different numbers of luminaires. The central battery system in the TKT78C series is particularly suitable for medium-sized buildings.

Emergency lighting can be implemented by one of two possible methods: as a system comprising self-contained emergency lights or as a system implemented using a central battery unit. In the self-contained system, each luminaire has its own power source--in the case of our self-contained emergency lights, this is a supercapacitor or a battery ...

The 31 and 41 central battery units are an easy and economical solution for supplying a relatively small number of luminaires in a limited area. These systems are especially suitable for properties and premises where the system is to be divided into several independent areas. The 31 system has 4 output circuits.

The central battery system is compatible with all of our 230 V addressable luminaires so you can replace an existing system with ease. The TKT7 series is an easy to adapt solution for locations which need different numbers of luminaires. ... Teknoware Oy . Our passion is finding the best lighting, interior or emergency

lighting solution for ...

It is recommended for medium and large buildings and for use with central battery systems across multiple independent areas. The document provides information about the TAPSA CONTROL CENTRAL BATTERY UNIT ...

Teknoware offers a wide range of products for Central Battery Systems, including 230V Central Battery Systems, Intelligent Controllers, Local Controllers, Switch Controllers, Remote Central Monitoring Options, and Interfaces for Building ...

Teknoware offers a 230V AC/DC-based Central Battery System (CBS) consisting of control panels, aesthetically appealing emergency and exit luminaires, sub-circuit monitoring modules, address modules to connect third-party luminaires ...

Teknoware also manufactures a range of central battery systems. In addition to the standard features, there is also available an automatic addressable testing system. Teknoware's entire product range is designed to meet the ...
