Daystar energy solutions Bangladesh

The Daystar Energy 100MW Agrivoltaic Solar project is a solar/Hemp agriculture combined project. We have been granted a license to grow industrial cannabis (hemp) which we will not only use to generate carbon offsets (approx 6500t/year+) but biochar (soil rejuvenation) and graphene from the bast fibre (for possible use in our battery technology).

Recognizing the urgent need for sustainable solutions, these innovators embarked on a mission to develop a new way to harness the power of renewable energy. Pioneering change initiative for renewable energy. Bangladesh is heavily dependent on non-renewable energy sources such as coal, oil, and natural gas, which are decreasing with time.

Bangladesh receives on average 3.5-4.5 peak sunlight hours a day with irradiation of 5 kWh/m2, with the South receiving maximum intensity. According to the Bangladesh Power Development Board, the country has the potential to generate over 50 GW of renewable energy from sources like solar, wind, hydro, and biomass.

Daystar Power specialises in providing solar power and energy efficiency solutions for businesses in the commercial, industrial, and agricultural sectors that result in significant reduction of power costs, diesel consumption and pollution.
