In the near future, their company DENS (Dutch Energy Solutions) will present the first generator that uses hydrozine to generate electricity. It is the result of endless experimentation, not being afraid to make mistakes, trying out new parts and persevering in the face of seemingly unsurmountable problems. The founders and their team members ...

The limited availability of green Hydrogen still stands in the way of broad deployment of this energy carrier. The Dutch-based techcompany DENS is tackling this problem at its core, namely by developing a generator that produces hydrogen, and then converts it into electricity. It isalso developing powerful battery systems. ?
