Djibouti dale power solution

Engineer has become available. While we are based in Scarborough the role can be home based / hybrid once training on our unique products and processes has been delivered.

Diesel generators are those that are run on diesel, and can typically be divided into two basic parts: a diesel engine and an electrical generator. Diesel generators can be used to provide power to places that are not powered by a power grid or can be used as a backup in case of a power outage. Natural gas generators

What we've been able to achieve working with Dale Power Solutions is effectively a 2MW HV power generation unit in a 24ft container. This container can be installed in modular fashion using 12 tonne lifts which able to use the platform crane to achieve installation. Andrew Ennis, Senior Rotating Equipment Engineer, Shell Global Solutions UK
