

El Salvador atrium power products

What is El Salvador's energy sector like?

El Salvador 's energy sector is largely focused on renewables. El Salvador is the largest producer of geothermal energy in Central America. Except for hydroelectric generation, which is almost totally owned and operated by the public company CEL (Comisión Hidroeléctrica del Río Lempa), the rest of the generation capacity is in private hands.

How does EDP work in El Salvador?

By shifting a significant amount of power supply to natural gas, EDP reduces El Salvador's reliance on diesel and heavy fuel oil-fired power generation, offsetting 600,000 tons of carbon dioxide emissions per year, and provides grid support to facilitate more renewable energy penetration, further diversifying the country's energy mix.

Does El Salvador use natural gas?

The plant's use of natural gas will reduce the amount of imported diesel and heavy fuel oil fired generation in El Salvador's electricity mix, resulting in significant environmental benefits for the country and the region.

Will EDP introduce a new source of thermal energy to El Salvador?

EDP will introduce a new source of thermal generation to El Salvador through power purchase agreements with seven of the country's distribution companies.

How many geothermal plants are there in El Salvador?

Currently, there are two geothermal facilities in operation in El Salvador, the 95 MW Ahuachapán, and the 66 MW Berlin plant. Majority state-owned power company LaGeo, formerly Gesal, operates the two plants. LaGeo is currently expanding the two existing geothermal plants, as well as conducting a feasibility study for a third plant, Cuyanausul.

How much electricity does El Salvador produce a year?

Gross electricity generation in 2006 was 5,195 GWh, of which 40% came from traditional thermal sources, 38% from hydroelectricity, 20% from geothermal sources, and 2% from biomass. In 2006, total electricity sold in El Salvador was 4,794 GWh, which corresponds to 702 kWh annual per capita consumption.
