

Energy infrastructure company Aruba

Where does Aruba get its electricity from?

Aruba currently gets 15.4% of its electricity from renewable sources. The island has sufficient renewable energy resource potential, with excellent technical potential for ocean, wind, and solar renewable energy generation.

What is the cost of electricity in Aruba?

The energy landscape of Aruba, an autonomous member of the Kingdom of the Netherlands located off the coast of Venezuela, is outlined in this profile. Aruba's utility rates are approximately \$0.28 per kilowatt-hour (kWh) (below the Caribbean regional average of \$0.33/kWh).

How much money will be invested in the construction of Aruba?

Eagle LNG will invest \$100m (182,000,000 florin) in Aruba's infrastructure. This investment is expected to create 80 to 100 construction jobs during the construction period and reduce energy costs by '100s of millions of florins'. Additionally, it aims to reduce air pollution and carbon emissions from electricity production and help revitalize 'Refineria di Aruba'.

How much energy does Aruba consume annually?

Aruba has an annual consumption of 990 gigawatt-hours (GWh). Currently, about 13% of its generation comes from a 30-MW wind project and 0.9% comes from waste-to-energy (WTE) biogas. An additional renewable capacity of 34 MW is planned or in progress. Aruba's installed generation capacity is 230 megawatts (MW) with an average load of 100 MW.

Will Eagle LNG and RDA develop a natural gas facility in Aruba?

Eagle LNG and RDA have signed a letter of exclusivity for the development of a natural gas facility in Aruba.

What can Aruba do with LNG?

Aruba can utilize LNG to open up new pathways to zero carbon that do not require the use of large amounts of land. This includes introducing renewable natural gas from naturally occurring sources such as garbage dumps and livestock digesters, and introducing hydrogen in the future.

Unified Infrastructure Solution Overview Getting back to office? Deploy a single architecture from edge-to-cloud, eliminating network constraints with seamless integration across wired, wireless, WAN, and VPN infrastructures.
