

What is a multi-cam locking system?

Multi-Cam Locking Systems are always installed within the door's surrounding sealing profile. With this system, doors and flaps of large control cabinets or other enclosures can be opened and closed quickly and easily, even in areas that are difficult to access. What are the types of Multi-Cam Locking Systems?

Do lithium ion cabinets protect batteries?

Lithium-ion cabinets reliably protect batteries and batteries against mechanical effects, as a result of which a so-called 'thermal runaway' can stand. Looking for a larger solution? We have solutions for larger space requirements, like cabinets and containers. To find out more go to 'Storage & Process Technology'.

What happens if a lithium battery is stored in a Nios Safety Cabinet?

If a fire breaks out in a building where lithium batteries are stored in a DENIOS safety cabinet, the fire brigade will have at least 90 minutes to evacuate people in case of fire and an escalation of the fire due to ignition or explosion of lithium batteries in the enclosed cabinet can be avoided.

How does a door lock work?

Additional compression The locking points with compression function pull the door securely and smoothly into the surrounding door sealing with additional compression of 4mm for 90°; closing or 4.5mm for 180°; closing. Even with high sealing pressure, your door closes dust and splash-proof according to IP65.
