

Enmass energy French Southern Territories

What is the EnMass Energy platform?

The EnMass Energy platform is a digital solution created by our founder Andrew in 2012 to help overcome challenges and roadblocks in building waste to energy projects. It was inspired by his own experiences and lack of such a platform in the market.

What are the French Southern & Antarctic Lands?

The French Southern and Antarctic Lands are an overseas territory of France that consist of the following: Adélie Land (Terre Adélie): This is the French claim on the continent of Antarctica. Crozet Islands (Îles Crozet): A group of islands in the southern Indian Ocean, located south of Madagascar.

What is EnMass Energy?

EnMass Energy is a cloud-based platform that provides a single source of truth to manage communication, track shipments, and rank feedstock vendors for better strategic decision making.

What is the French Southern Territories?

The territory is sometimes referred to as the French Southern Lands (French: Terres australes françaises) or the French Southern Territories, usually to emphasize non-recognition of French sovereignty over Adélie Land as part of the Antarctic Treaty System. The entire territory has no known permanently settled inhabitants.

Why is Harmony Energy France launching a battery energy storage facility?

Harmony Energy France CEO Andy Symonds stated: "Developing and operating vital battery energy storage facilities across France, will lead to enhanced energy security, more affordable energy bills, and the decarbonisation of the grid. We are excited to commence building works on our first project." How well do you really know your competitors?

Are France's Islands self-sufficiency?

The challenge is greater for bigger islands, especially those with significant industrial activity, high standards of living and large numbers of people. Another of France's island departments, Corsica, has similar energy self-sufficiency to Réunion, about 13%. The two islands share the same electricity grid operators.

Particularly affected by climate change, the French Overseas Territories must reconcile the inseparable and complementary objectives of energy "transition" and "autonomy". During the consultation on the energy ...

All of the islands of the French Southern Territories have large populations of penguin, albatross, and seals. Early-20th-century introductions of rats, cats, rabbits, pigs and goats have now mostly been eradicated but left
