Who is AMEA power?

AMEA Power is one of the largest customers for solar and wind equipment across Africa, Middle East and Asia region, and we are committed to incorporating sustainable practices in the procurement process of key components and materials.

How AMEA power is working to develop RO desalination plants?

AMEA Power is working to develop RO Desalination plants using Renewable Integrated Energy. The Integration concept is given below. When the Renewable Power is available the RO Desalination plant operates directly using the Renewable power.

How much electricity does AMEA power use?

The electricity consumption at our corporate offices and our site offices are either tracked or estimated. In 2021, AMEA Power's offices region-wide is estimated to have consumed 58.8 MWh of electricity which is estimated to have emitted 13,7 tons of CO<sub>2</sub>.

How does AMEA power make money?

AMEA Power's revenues derive from the sale of 100% green power, generated by utility-scale renewable energy assets under long-term offtake arrangements. All operational assets are fully contracted with diversified and creditworthy counterparties for a period of 20-25-years contractual life.

How much CO<sub>2</sub> does AMEA power emit in 2021?

In 2021, AMEA Power's offices region-wide is estimated to have consumed 58.8 MWh of electricity which is estimated to have emitted 13,7 tons of CO<sub>2</sub>. AMEA Power's emissions equate to 0.02% of the total GHG emissions avoided as a result of the renewable energy generation from our project portfolio.

What certifications does AMEA power have?

On March 2021, AMEA Power has successfully achieved the ISO certifications according three international standards: ISO 9001:2015 (Quality), ISO 14001:2015 (Environment), ISO 45001:2018 (Health and Safety). These ISO certifications encompass processes of engineering, construction, operation and maintenance of renewable energy projects.

UAE - Mubasher: Dubai International Chamber has contributed to the expansion of UAE-based renewable energy firm AMEA Power into the African continent through its business in Mozambique. The company will work with Mozambique's Hidropower to develop the 125 megawatt-peak (MWp) Matambo solar photovoltaic (PV) power plant in a project worth ...

Independent Power Producer (IPP) Amea Power and its South African partners have completed the financing of the Doornhoek solar farm in North West Province. The plant will have a capacity of 120 MW. ... 225KV
