How much oil does Equatorial Guinea produce a day?

As of 2004, Equatorial Guinea was the third-largest oil producer in Sub-Saharan Africa. Its oil production had then risen to 360,000 barrels per day (57,000 m³/d), up from 220,000 barrels per day (35,000 m³/d) only two years earlier. Forestry, farming, and fishing are also major components of GDP. Subsistence farming predominates.

Does Equatorial Guinea reinvest oil revenue into agriculture?

Although pre-independence Equatorial Guinea counted on cocoa production for hard currency earnings, the neglect of the rural economy under successive regimes has diminished potential for agriculture-led growth. However, the government has stated its intention to reinvest some oil revenue into agriculture. [citation needed]

What happened in Equatorial Guinea after the oil price collapsed?

After the oil price collapsed in 2014, the economy went into a free fall which put growth in a downward spiral from around 15% to -10%. Only 950,000 of 1.6 million inhabitants are citizens, giving Equatorial Guinea the largest ratio of expatriates to residents in Africa.

Does Equatorial Guinea have a balance-of-payments situation?

Equatorial Guinea's balance-of-payments situation has improved substantially since the mid-1990s because of new oil and gas production and favorable world energy prices. Exports totaled about francs CFA 915 billion in 2000 (1.25 G\$US), up from CFA 437 billion (700 M\$US) in 1999.

What is a good book about Equatorial Guinea?

ISBN 0-465-08760-4. A World Bank economist tries to assist pre-oil Equatorial Guinea. Max Liniger-Goumaz, *Small Is Not Always Beautiful: The Story of Equatorial Guinea* (French 1986, translated 1989) ISBN 0-389-20861-2.

Is biomass a source of electricity in Equatorial Guinea?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Equatorial Guinea: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.
