Who are Esken renewables?

Established in 2009, Esken Renewables - formerly known as Stobart Energy - supplies 1.7 million tonnes of fuel to the UK biomass sector under long-term contracts, the majority of which comes from waste wood which would otherwise be destined for landfill.

What happened to Esken renewables?

On February 2, 2023, the company reported that Esken Renewables' biomass plant customers had experienced unplanned outages during the winter months, reducing the total volume of waste wood supplied by Esken and the associated gate fee income.

Can Esken renewables be sold?

A sale process for Esken Renewables is currently in progress, with a number of interested parties involved in discussions. A decision has also been taken to explore a sale of the Aviation business, primarily London Southend Airport, with initial planning for this phase having commenced.

How will Esken renewables perform in 2024?

As a result, Esken Renewables is now expected to deliver EBITDA of circa £19m for the full year. Management expect that normalised plant operating levels and waste wood supply will return in 2024 and, as of March 1, 2023, all plants are operating.

Does Esken renewables have a sub supply agreement with Chilton biomass?

As announced previously, Esken Renewables also entered into a new sub supply agreement to support the Chilton Biomass plant, replacing the supply provided by the Port Clarence processing and storage site, creating an additional £0.9m of annual recurring EBITDA from April 1, 2023.

Why did pioneer Balmoral buy Esken renewables?

The managers of Pioneer Balmoral UK, Pioneer Point Partners LLP, explained on their website that they were acquiring Esken Renewables with a strategy to continue scaling the business. They added: 'The Company is strongly aligned with Pioneer's objectives of contributing to the green transition and to the circular economy.'
