ESM-48150B1 is an energy storage module based on innovative Li-ion technology. It is especially designed for telecom sites with advanced features: long lifespan, wide range of charging voltage, fast charging, intelligent management, and software anti-theft. ESM-48150B1 can be paralleled with lead-acid battery directly, which

ESM-4850A1 Datasheet Features Introduction Specifications ESM-4850A1 is an energy storage module based on innovative Li-ion technology. It is especially designed for telecom sites with advanced features: long lifespan, wide range of charging voltage, fast charging, intelligent management, and software anti-theft. ESM-4850A1 can be

Lithium Battery ESM-48100B1. Lithium batteries provide backup power. When the mains is normal, the UPS charges batteries. When the mains fails, lithium batteries supply power to the UPS. Figure 3-3 Lithium battery. Table 3-4 Lithium battery technical specifications. Item. Specifications. Capacity. 100 Ah. Voltage.
