

# Ess applications Israel

What is the ESS agreement in Israel?

The contract is the largest ESS agreement signed to date in Israel, bolstering the country's energy transition and marking a massive scale-up in installations for the newly launched system. Last year the Israeli government introduced its goal of generating 30% of its electricity needs via renewables by 2030.

What can ESS do for You?

Combining with the solar system, the highly integrated ESS can be widely used in multiple applications, including energy shifting, ancillary service, like ramp rate control, reactive power provision and more.

How will solar power impact Israel's Energy Future?

Last year the Israeli government introduced its goal of generating 30% of its electricity needs via renewables by 2030. Solar PV is expected to contribute to most of it, corresponding to 26% of Israel's renewable electricity in 2030, indicating 12 GW to 15 GW of new PV installations in the coming decade.
