What is ESS Energy Center TM?

PDF of Release Wilsonville, OR - February 10, 2021: ESS Inc ., a manufacturer of long-duration iron-based flow batteries for commercial and utility-scale energy storage applications, announces the launch of its next-generation storage solution, the Energy Center TM.

Why should you choose ESS Energy Center?

Flexible, configurable and upgradable: Energy systems and markets are evolving rapidly. The ESS Energy Center is designed with flexibility in mind to adjust to changing needs over the 25-year operating design life.

What is the Energy Center?

With the Energy Center, you're getting a commercially ready system using ESS battery technology backed by Munich RE. The Energy Center supports a wide range of applications:

What applications does the Energy Center support?

The Energy Center supports a wide range of applications: ESS has worked closely with leading engineering firms to deliver a design-build approach that enables systems to be tailored to any project size with a configurable range of power and energy capacities starting at durations beyond six hours.

What chemistry does the Energy Center use?

The Energy Center utilizes an environmentally benign and sustainable flow battery chemistry composed of earth-abundant iron, salt, and water, and containing no hazardous chemicals or rare-earth metals.

What makes the Energy Center unique?

Easy to site, install and operate: The Energy Center's environmentally benign chemistry - comprised of iron, salt and water - make this solution one of the easiest to deploy and maintain. No toxic materials facilitates permitting. No risk of thermal runaway delivers safe, reliable operation. Standard components enable service and repair.

WILSONVILLE, Ore., January 17, 2024--ESS Tech, Inc. ("ESS") (NYSE: GWH), a leading manufacturer of long-duration energy storage systems (LDES) for commercial and utility-scale applications, today ...

The Energy Center is the ESS "battery-in-a-building" platform designed for utility-scale, front-of-meter applications that decouples power and storage capacity to enable up to GW-scale projects with variable storage durations ranging up to 12 hours. Its environmentally benign chemistry - composed of iron, salt and water - make this ...

Update: October 19, 2021 ESS began trading publicly on the New York Stock Exchange on October 11, 2021.
