What is the Liam F1 urban wind turbine?

The Liam F1 Urban Wind Turbine is a compact power-generating device featuring an innovative design inspired by the Archimedes screw principle and windmills.

How many directions can a wind rose be produced?

The wind rose will be produced for a total of 16 directions, each one representing 22.5 degrees. The first direction is centred on North (i.e. 0 degree), and the last one on NNW (i.e. 337.5 degree). You can also indicate which class to plot, and if it must be filled or not.

How do I rescale the radial axis of a wind rose?

The wind rose tab generates 2D and 3D wind rose diagrams, which plot the frequency of wind by speed and direction. You can rescale the radial axis by moving your cursor near the North label ("N") at the top of the plot. Small +/- buttons will appear (7) that increment or decrement the range.

How do you write a wind rose?

For example, if a wind speed smaller than 1 m/s is observed 300 times from North, write 300 within the leftmost cell of direction North (indicated with N). The wind rose will be produced for a total of 16 directions, each one representing 22.5 degrees.
