

What is a Modula automated warehouse?

Modula automated warehouses, combined with our warehouse management systems, are the ideal response to companies' storage and picking requirements, regardless of the industry sector or the type of item to be stored.

How much inventory can Modula store?

The Modula system was able to store approximately 90% of our inventory - we couldn't believe it! Modula saves us hours every day in set up time and the convenience of having all our inventory in one location. When we needed service, we had it within a couple hours of our call and the problem was solved. We are really happy.

Where are Modula products made?

Made in the USA, Modula products are available from dealers across North America who are ready to help you find the innovative solutions that best serve your needs. The Modula systems enable us to pick components for kits much faster as the operators used to walk between sections, looking down rows of aisle trying to find a specific location.

What is a modular warehouse?

A product that has been well thought out in terms of the mechanics and software. Modula is the name of the Italian company that designs and manufactures automatic vertical and horizontal warehouses suitable for any industrial sector or environment.

What can Modula do for You?

Transform your material handling with the most advanced automated storage and retrieval systems from Modula. Recover wasted floor space, maximize payloads, customize warehouse configurations, then reposition and rescale as needed.

Why do you need a Modula system?

Our tooling is very expensive. To minimize damages, the employee needs to work at a safe level. The Modula systems give us the perfect solution, and with safe and easy access, we have less damage to our products. The ergonomics of the Modula system also allow us to work very comfortably.

Speroni decided to install a Modula storage system integrated with an anthropomorphic robot to serve the production line. Its main function is to work 24/7 as a buffer storage area. In this way, it is possible to store a greater quantity of semi-finished and finished components and enable the workstation to operate autonomously even for long ...
