

France solar for house price

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR540 per household per year.

How much do solar panels cost in France?

Pricing will depend on the power capacity of the panels, but as of 2022 (and without considering any government assistance), you can expect to pay approximately EUR9,000 to EUR15,000 to install solar panels in France. You can sell the energy produced back to the grid.

Can you have solar panels on a property in France?

Other rules may apply if your property in France is located in certain historic areas. Read more: Can you have solar panels on homes in historic areas of France? You will also need to contact Consuel for an Attestation de Conformité to confirm your installation is safe to be connected to the main power grid, which costs EUR180.

Are there grants for solar panels in France?

There are also grants available for energy conservation (but not photovoltaic solar panels) as part of the home improvement grant regime 'MaPrimeRénov' run by Anah, the housing renewal agency, but these are means-tested. How much does it cost to install Solar Panels in France?

Are there tax credits for solar panels in France?

Since 1st January 2014 there are no longer any tax credits available for the installation of photovoltaic solar panels. Nevertheless, in France, as in many other countries, there are incentives in place for property owners to sell electricity back into the grid at preferential prices.

What are the different types of solar panels in France?

The most common type of solar panel in France is the 'photovoltaic solar panel' or PV (Panneau solaire photovoltaïque). These are typically fixed to the roof of the home, and they operate by using photovoltaic cells to generate an electric current when hit by the sun's rays. Within the PV type of solar panel, there are three sub-types in France:

As a result, France has only added 176 MW of solar PV capacity in the first quarter of 2020, which is 15% lower than during the last quarter of 2019. Despite this drop, the potential for solar energy development is still at an all-time high thanks to the success of the French government's renewable energy tenders.

French-Property is the leading portal for property in France. Find homes, houses and properties of all styles for sale by private sellers, immobilier and estate agents throughout France.

At the start of 2024, property prices in France were falling at the fastest rate in over 5 years. House prices in France fell by -1.0% in the 12 months up to August 2023 and are predicted to fall by -3% in the 12 months to November 2023. This decline in property prices is not uniform across France and it seems to be impacting larger houses more than apartments.
